

# AICS-TASK : 1

**TITTLE : Top 10 notorious Hackers in the World Summary and which the category of hackers comes under.**

**Name : Rohitha Koganti**

Here's a brief summary of the top 10 notorious hackers in the world up to cutoff date in September 2021:

Here's a brief summary of the top 10 notorious hackers in the world up to my knowledge cutoff date in September 2021:

**Kevin Mitnick:** Mitnick is a former black hat hacker who became one of the most infamous hackers in the 1990s. He was involved in high-profile computer intrusions and was known for his social engineering skills. He later turned white hat and became a cybersecurity consultant.

**Adrian Lamo:** Lamo gained notoriety for reporting U.S. Army intelligence analyst Chelsea Manning to authorities for leaking classified documents to WikiLeaks. His actions led to Manning's arrest and subsequent imprisonment.

**Julian Assange:** While not a traditional hacker, Assange is the founder of WikiLeaks, an organization that has published a vast amount of classified and sensitive information. His actions have made him a controversial figure in the world of cybersecurity.

**Albert Gonzalez:** Gonzalez was a notorious cybercriminal involved in credit card theft and data breaches. He masterminded the hacking of several major retailers, leading to massive financial losses.

**Gary McKinnon:** McKinnon, a British hacker, was accused of hacking into U.S. government computers, including NASA and the Pentagon. He claimed to be searching for evidence of UFOs and free energy technology.

**Astra:** Astra was the pseudonym of a teenage hacker from the Czech Republic who became infamous for hacking into major corporations and government websites. He was responsible for a series of high-profile breaches.

**Kevin Poulsen:** Poulsen, also known as "Dark Dante," gained notoriety for hacking into phone systems and winning a Porsche in a radio contest through his hacking skills. He later turned his talents toward journalism and cybersecurity.

**Anonymous:** Anonymous is a loosely organized collective of hackers and activists known for their involvement in various hacktivist campaigns. They have targeted organizations and governments worldwide to protest against censorship, corruption, and other issues.

**Lizard Squad:** Lizard Squad is a hacking group that gained attention for launching Distributed Denial of Service (DDoS) attacks on gaming networks, disrupting services like Xbox Live and PlayStation Network.

**Jonathan James:** Also known as "c0mrade," James was one of the youngest hackers to be imprisoned in the United States. He was involved in various cybercrimes, including hacking into NASA systems and stealing sensitive data.

The category of hackers these individuals fall into varies. Some were black hat hackers, engaging in cybercrime for personal gain or mischief, while others were hacktivists, using their skills for political or ideological reasons. Some have turned their skills to the white hat side, working as cybersecurity experts or consultants to protect organizations from cyber threats. It's important to note that the activities of hackers can evolve over time, and some individuals may transition between different categories as their motivations and circumstances change.
